How to Generate a URL QR Code

QR Codes are a quick and easy way to share links to webpages, documents, and surveys.

There are many websites that generate QR Codes, some for free and others require you to purchase access to your code. Two websites that provide free (but not editable) QR Codes are <u>QRCode</u> <u>Monkey</u> (www.qrcode-monkey.com) and <u>QR Code Generator</u> (www.qr-code-generator.com).

Generating a QR Code with QRCode Monkey:

1. Go to the QR Code Monkey Website (www.qrcode-monkey.com)

3. Select the box that says "Create QR Code"

4. After the QR Code refreshes, select the box that says "Download PNG"

5. An ad will appear while you wait for your QR Code PNG to download. Do not close out of that window until your QR Code has downloaded.

6. Your QR Code will appear in your download files and you are ready to use it!
