So many of the challenges we face today – pandemics, natural disasters, and economic uncertainty to name a few – are global in nature. This spring 2020 course (POS 125) will take a deep dive into topics like the future of food, energy revolutions, migration, and the environment. We will examine both the pitfalls and promises of where we've been and where we are going. Research and writing projects in this interdisciplinary course will allow students to get creative and to explore some of their own interests.

To register, type POS 125 in the search bar at: <https://www.mesacc.edu/schedule/search>
