Slips, Trips and Falls
Shouldn’t Happen At All

Hold the handrail when you go up and down the stairs.

Falls on stairs can cause severe injury. Stairs should be well lit and people using stairs should use one hand to hold the handrail.

Why be concerned about slips, trips and falls?
- Poor lighting
- Obstacles and clutter
- Unsuitable footwear
- Changes of floor level and slopes

Because they cause about 30% of workplace injuries at MCCCD

Do your part and report these hazards right away.
- Spills on floor
- Weather hazards
- Loose cables
- Loose mats and rugs
