2007 Dumpster Dive

Found in trash:

plastic bags. These are not recyclable on campus, but they are recyclable at the front of most grocery stores. These are bags that were brought onto campus from elsewhere. If people take them with them to recycle at the stores, they are eliminated from going to the landfills (at the expense of MCC, who pays for waste removal)

plastic beverage containers that should have been recycled

plastic disposable food service items (these are not recyclable; however, these are items that could perhaps be removed from the waste stream by other means, such as people bringing their own reusable containers or by alternate packaging options)

paper items that should have been recycled
