Welcome to Your MCC Internship Course

Dear Student,

You are about to enter a classroom for study that can possibly change the course of your life and your career! This Independent Internship model is designed to give you a variety of options for you to craft your own educational pathway unique to your career and educational interests.

Internship Courses have been proven to provide an exceptional learning experience through hands-on interaction in an area which you choose as interesting and/or challenging. You select the professor with whom you want to work and the location where you want to experience a real world environment.

With this educational experience you can acquire marketable skills, establish new networking opportunities, and mold the way to your future. We encourage you to enter this experience with enthusiasm, a willingness to learn, and a positive attitude.

This information packet is designed for you to become acquainted with the Mesa Community College Career & Re-Entry Services Internship program and policies. We will inform you about your responsibilities as an MCC Internship student and answer any questions you might have about your educational experience along the way.

The Career & Educational Planning administrators, faculty, and staff wish you a wonderful journey! Please make an appointment with me to register you in your appropriate internship class.

Welcome Aboard!
