Success from Day One

MCC supports and encourages student success and program/degree completion. Our "Success from Day One" agenda encourages all students to be prepared for and attend the first day of class. Students who attend the first day of classes are often most successful.

Pre-Financial Planning

Students who prepare financially are more successful in maintaining their progress toward course and program completion. Begin the pre-financial planning process which includes early research, education, and discussion with financial services staff and others regarding college resources and opportunities available to aid in your academic pursuits. Research options for financing college courses prior to registering for the semester. Print: 6.10.2014
