

Start Your Journey With SB&H!

Internship Opportunities & New Grad Career Opportunities

Southwest Behavioral & Health Services (SB&H) is one of the largest multi-faceted providers of public Behavioral Health Integrated Services. SB&H has an array of programs to meet the unique needs of the communities we serve. These include outpatient, residential, crisis, hospital setting, community outreach, housing services; prevention services, ASD, in-home, and school-based services. Our service areas include the Phoenix metropolitan area, rural Maricopa County, Gila, Mohave, Coconino, and Yavapai Counties.

Internship placements are for student's whose degree program requires an internship. In order to meet the growing needs of our university partners and students, we limit our placements to internships that qualify for credit hours towards either a graduate or undergraduate degree.

Field placement options include school-based setting, substance abuse services, licensed inpatient facilities, community living residential sites, and integrated care outpatient clinics. Each program services different members of the community ranging from children, adolescents, adults, and families.

Our internship learning experience allows you to participate in activities related to your education plan including providing crisis intervention, co-facilitating therapy & skill groups, documentation of services, provide care management services, complete assessment & treatment plans, and serve as an active member of your clinical team. *(counseling services for graduate students only)*

*All Duties performed under direct supervision.

How to Apply: Go to jobs.sbhservices.org

For New Grad's search keyword: **Direct Care Provider**

For an Internship Learning Experience search keyword: **Student**

Not sure which to apply for or have questions please email careers@sbhservices.org
